

Northville Christian School

Preschool Learning Charts

This Learning Chart is designed to explain the goals of our instructional program. It shows examples of the goals for students in each subject at your child's grade level. The chart does not list all of the skills children are taught or all of the concepts to which they are exposed. Instead, each section indicates some of the skills the majority of students possess after they have completed that grade level. The rate of progress will depend upon individual differences and teaching styles.

The skills and concepts are listed in separate subject areas on this chart. They are taught in conjunction with one another so that the student can recognize the relationships among the various subjects. Many skills are practiced and improved upon in more than one grade level.

Learning Charts for each grade level were compiled by the Northville Christian School faculty, in cooperation with the administration, to be used as a helpful guide for parents.

Phonemic Awareness

- Identify rhymes words
- Produce rhymes words
- Count syllables in words
- Learn letter sounds

Reading

- Be introduced to the letters of the alphabet; match lower case letters to capital letters
